# WHO ARE WE?

## Birds Australia North Queensland (BANQ)

is a regional group of the national organisation Birds Australia (Royal Australasian Ornithologists Union, RAOU), formed in 1901 - the oldest Australian society concerned with national and international bird study and conservation.

The BANQ area covers Queensland from Ayr north to the Torres Strait Islands and west to the Northern Territory border. Area representatives are based in Townsville, Mount Isa, Cairns, Atherton Tableland, Mossman/Daintree, and Cape York.

Members receive a quarterly newsletter *Contact Call* and enjoy Australia's best bird magazine *Wingspan*. Regular field trips and campouts cater for all levels of expertise from beginner to professional and emphasise fun as well as worthwhile projects.

## LIST ANNOTATIONS

**C=Common**      Likely to be recorded on most visits  
**U=Uncommon**    Recorded regularly but not every visit  
**R=Rare**          Recorded infrequently  
**L=Local**

**h=More often heard than seen**  
**Mn=Migrant from the North (approx Oct-Mar)**  
**Mw=Migrant from the West (approx May-Sep)**  
**E=Wet Tropics Endemic**

**Definition:** The C/U/R annotations in this list give an indication of how easy or difficult it might be to find a species. They indicate the likelihood that an experienced birder might record the species, during a day bird-watching, at the right time of year, in the appropriate habitat.

# INFORMATION

*Townsville district* covers an area from Paluma south to Townsville City, inland to Herveys Range and Woodstock, and south to Giru.

Within this area are many habitats including coastal beaches and mangroves, freshwater swamps, dams and lagoons, creeks and rivers, melaleuca woodland, dry eucalypt woodland, wet sclerophyll and upland rainforest. This diversity of habitats attracts a large range of bird species within a relatively small area and offers birding opportunities with over 350 species, including many Wet Tropics endemics. Townsville's relatively dry climate allows many inland species to reach the coast.

**Parks and reserves:** Paluma Range, Bluewater Forest Reserve, Bowling Green Bay, Magnetic Island, Town Common.

**Areas of interest:** Cromarty and Giru Wetlands, Ross River, Ross River Dam, Toonpan, Serpentine Lagoon, Palmetum.

This list is a guide to species birders might reasonably expect to see, across all seasons and a range of weather and other conditions. They include residents, seasonal migrants, regular visitors and some uncommon visitors.

Names and taxonomic order used for the list follow *Systematics and Taxonomy of Australian Birds* by L Christidis and W E Boles (CSIRO, Melbourne, 2008). Birdlist by J Wieneke [www.nqbirds.com/](http://www.nqbirds.com/) & BANQ members and friends.
